

I am writing to request that the FCC does not implement any proposal that would lessin Indian'a Telephnone Privacy law.

My husband and I have been extremely pleased with the effectiveness of Indiana's Telephone Privacy law. Before we were on the privacy list we would receive 6-10 soliciting calls per day. This was very frustating for my husband since he works third shift and sleeps during the day. Since we have been on the privacy list we haven't received any unwanted calls and have been able to enjoy our time together at home without any unwanted interruptions.
